WINKEL-CENTRUM.NL

GPLDOWNLOADS.NL

MOTORFIETSEN.NL

Who ever said WooCommerce is slow, just never saw a fast version.

Winkel-centrum.nl is an affiliated woocommerce website with lots of products, and growing.

Opensource software can cost money, but is allowed to resell.

Gpldownloads makes older versions of opensource software available for rollbacks and development purposes.

Pushing WordPress, this site has 750.000 pages and will probably have 1.000.000 when I am done, includes WooCommerce and runs on the cheapest server alive: a raspberry pi on a basic internet home connection. Build just to prove scalability does not need expensive hosting.

PUDDING.NL

The predecessor for pudding.com, pudding.nl still has some pages that have traffic on the dutch content.

The project is not abandoned and still maintained, but there is no new content. Super fast 300 ms

RLSD.NL

As the funny project started a website for real life sex dolls

Still a work in progress,... just start laughing each time which makes me go and something else.
